

Website Analysis

Business Name: CarMeet

Website Goal:

CarMeet is a web-based platform dedicated to connecting car enthusiasts in a social, event-driven environment. The goal is to create a central hub where automotive lovers can discover and attend local car meetups, showcase their vehicles, and engage with like-minded individuals. By integrating event management tools, interactive social feeds, and map-based event discovery, the platform aims to foster stronger community connections among car enthusiasts. More than just an event board, CarMeet aspires to be the go-to online space for car culture, enabling users to share their passion, organize memorable gatherings, and build lasting friendships.

Target Market Analysis:

Competition

Within the niche of automotive social networking and event platforms, CarMeet faces competition from both dedicated car meetup apps and broader event-based platforms like Facebook Events, Meetup.com, and automotive forums. Many of these competitors already have established user bases, integrated location-based features, and strong brand recognition. Some offer highly specialized tools for event promotion or advanced community engagement features. Despite these challenges, CarMeet aims to differentiate itself by combining a modern, responsive design with a secure, user-friendly interface tailored specifically for the car enthusiast community, integrating interactive feeds, custom car profiles, and Google Maps API for seamless event discovery.

Objective Strategies:

- Continuously improve platform features to provide a smooth, engaging, and responsive user experience across all modern browsers.
- Foster an active and interactive community by enabling photo sharing, likes, and comments to enhance social engagement.
- Leverage Google Maps API to simplify location-based event discovery, making it easy for users to find nearby meetups.
- Maintain strong security measures to protect user accounts and ensure safe interactions within the platform.

- Regularly update the platform with new features, design enhancements, and event management tools to keep the community active and returning.

Personas:

Primary Persona Thabo “T-Bone” Mokoena

Age / Location / Role

28, Cape Town, South Africa Automotive technician & weekend event organizer

Background

- Works in an auto workshop, highly involved in the local car scene.
- Runs a small Instagram page showcasing builds and local meetups.
- Comfortable with web and mobile apps; uses Google Maps and social platforms daily.

Goals

- Quickly create, promote and manage local car meetups.
- Showcase his car’s modifications and build a following.
- Connect with other enthusiasts and recruit volunteers for events.
- Keep event info accurate (time, location, rules) and get RSVPs.

Frustrations / Pain Points

- Event info scattered across platforms (WhatsApp, Instagram, Facebook).
- Hard to find reliably organized, local car events with accurate directions.
- Managing RSVPs and last-minute changes is chaotic.
- Photo quality reduced or lost when sharing across many channels.

Tech Comfort / Devices

- Smartphone-first (Android) uses laptop sometimes to manage listings.
- Comfortable with maps and posting photos; expects smooth responsive UI.

Key Scenarios

- Creates a Saturday night meet adds description, location pin, photo gallery, and sets capacity.

- Edits location/time after attendees ask for change → needs push updates to RSVPed users.
- Browses the map to discover nearby events while travelling.

Motivations

- Reputation in the community, ease of organizing, more attendees, smoother logistics.

Representative Quote

“Make it simple to post a meet set the spot on the map, add a few pics, and let people RSVP. I need attendees, not admin headaches.”

Top Features that Matter

- Fast event creation + editable event details.
- Map-based discovery and directions (Google Maps integration).
- Photo galleries, likes, comments and share too social.
- RSVP / capacity management and push/notification updates.
- Event moderation controls and ability to appoint co-hosts.

3 Example User Stories

1. As an event organizer, I want to create an event with a pinned map location and capacity limit so I can manage attendance.
2. As an organizer, I want to send updates to all RSVPed users, so they're informed of last-minute changes.
3. As a user, I want to upload a gallery of my car with captions so others can view and comment.

Secondary Persona Sarah Mthethwa

Age / Location / Role

22, Stellenbosch University student, new to the car scene

Background

- Recently developed an interest in classic cars after attending a friend's meetup.

- Active social media user but hasn't joined any dedicated car community.
- Relies on recommendations and event listings to attend her first gatherings.

Goals

- Find beginner-friendly, local car meetups to learn and socialize.
- View event photos and read comments to assess the vibe and safety.
- Save events and get simple directions and parking info.

Frustrations / Pain Points

- Intimidated by closed groups and jargon-heavy posts.
- Unsure which events welcome newcomers or spectators.
- Hard to know where to park or if an event is free/open.

Tech Comfort / Devices

- Mobile-first (iPhone), comfortable with apps and social feeds but prefers clear, simple interfaces.

Key Scenarios

- Searches the map for “beginner-friendly” or “family-friendly” events and filters by distance.
- Views event page with FAQs (parking, entry fee, family-friendly).
- RSVPs as “attendee” and receives a reminder + simple directions.

Motivations

- Learning, socializing, meeting friendly people in a safe environment.

Representative Quote

“I want to go to meets but don't know which one's welcome new people I need clear info and a friendly vibe.”

Top Features that Matter

- Filtered map discovery (beginner-friendly, spectator allowed, free entry).
- Clear event pages with FAQs, parking and safety notes.
- Social feed with tagging, comments and beginner-friendly badges.
- Easy RSVP and calendar integration + reminders.

3 Example User Stories

1. As a newcomer, I want to filter events by “beginner-friendly” so I can find welcoming meetups.
2. As an attendee, I want clear parking and entry info on the event page, so I don’t get lost or turned away.
3. As a user, I want to save events to my calendar and get a reminder, so I don’t miss them.
